# Woodtec

*All our Radiator Cabinets are made to measure at our workshop near Sevenoaks in Kent.*

*Fitting radiator cabinets in your home can improve warm air circulation in the room as heat is directed out through the top vents rather than escaping vertically to the ceiling.*

*Our cabinets are available in a variety of designs from contemporary to traditional or created to your own design.*

*We offer a large selection of decorative grilles and cabinets that can be supplied in unfinished MDF, or primed, stained, or painted, or in solid timber. We offer a supply only, or measuring and full fitting service, to suit your requirements.*

*Cabinet with Stars & Moons grille*

*Cabinet with Hearts grille*

*Dedalo grilles and square bottom aperture*

*Gotico SPW61 grilles and decorative bottom aperture*
